

EDUCATION

- **Misr University for Science and Technology** Cairo, Egypt
Bachelor of Science in Computer Science; GPA: 3.8 2022 – 2026
 - **Relevant Coursework:** Data Structures, Algorithms, Databases, Software Engineering, Operating Systems, Networks, System Analysis and Design
 - **Graduation Project:** TennisFinder, a multi-sided tennis marketplace platform; achieved a final grade of A+.

EXPERIENCE

- **MNT-Halan – Talabeyah** Cairo, Egypt
Full-Stack Developer Intern Aug 2026 – Sep 2026
 - **Frontend Development:** CSS Flexbox/Grid, responsive design, modern JavaScript (ES6+, async/await), TypeScript (interfaces, utility types), Angular, and the Observer design pattern.
 - **Backend and OOP Development:** C# and OOP principles including SOLID, Singleton, Strategy, Factory, Builder, and Decorator design patterns, alongside Entity Framework Core, LINQ, and SQL Server.
 - **Collaboration and Practices:** Full-stack feature work across Angular, TypeScript, JavaScript, and .NET, collaborating with the team using Git.
- **CodeCampsis – German Startup** Remote
Backend Engineer Intern Sep 2025 – Dec 2025
 - **API and Identity:** Built REST APIs for an internal e-learning platform using ASP.NET Core and SQL Server, and implemented ASP.NET Core Identity with role-based access control (RBAC) for learners, instructors, and admins, partnering directly with stakeholders to translate business requirements into technical solutions.
- **WE (Telecom Egypt)** Cairo, Egypt
Backend Web Development Trainee Jul 2025 – Sep 2025
 - **Backend Development:** Completed a 170-hour ASP.NET backend program covering C#, OOP, SOLID, LINQ, and Entity Framework Core, then built a full MVC/Web API project applying database design, business logic, and RESTful endpoints using Agile practices.

PROJECTS

- **TennisFinder – Graduation Project**
Node.js, Express, TypeScript, Prisma, PostgreSQL, Clerk, RESTful API
 - **Overview:** A multi-sided marketplace platform for tennis players, court owners, and academies — covering court discovery, player matchmaking, tournaments, and AI-enhanced insights.
 - **Architecture Decision:** Led a high-risk backend migration from Convex to a custom Node.js/PostgreSQL stack within a one-week window to meet the graduation deadline.
 - **Core Features:** Built geo-spatial court discovery, conflict-aware reservation scheduling, and AI-driven features for opponent matchmaking, marketplace pricing, and demand forecasting; integrated Clerk for RBAC and built an admin dashboard for court approval, invoice tracking, and reporting.
- **MPC (Makkah Park Clinic) – Freelance Project**
Hono, TypeScript, PostgreSQL, DrizzleORM, RESTful API
 - **Overview:** A bilingual (Arabic/English) healthcare platform with a decoupled architecture; developed APIs for patient records, visit history, and appointment scheduling with real-time availability, plus payment integration and automated invoicing, as a standalone backend for a Next.js frontend.
- **FHTC – Freelance Project**
Convex, TypeScript, Better Auth, PostgreSQL, RESTful API
 - **Overview:** An academic supervision platform automating student training lifecycles, from application submission to payment processing; built a multi-stage workflow engine, integrated Moyasar payments with automated accounting sync, and a support ticketing system.
- **Klineck – Collaborative Freelance Project**
Next.js (API Routes), PostgreSQL, DrizzleORM, RESTful API
 - **Overview:** A SaaS clinic management platform with multi-clinic isolation and role-based access; built backend logic for prescriptions, invoicing, and multi-tenant data modeling.

TECHNICAL SKILLS

- **Languages:** C#, SQL, TypeScript, JavaScript, Python, C++ **Runtimes & Frameworks:** ASP.NET Core, ASP.NET MVC, Angular, Node.js, Express, Hono, Next.js
- **ORMs & Databases:** Entity Framework Core, SQL Server, PostgreSQL, Prisma, DrizzleORM, Convex **Architecture:** OOP, SOLID, Design Patterns, LINQ, RESTful APIs, RDBMS Design, Type-Safe Systems
- **Tools:** Visual Studio, Rider, Git/GitHub, Cursor, Claude Code, Postman, Clerk Auth, Better Auth, HTML, CSS
